Golden Goal is a Zoom Virtual Soccer feature that can result in an immediate win for the player who placed a bet on the team that scored it independently from the final outcome of the game. The feature is randomised and available exclusively on the markets “1X2 FT” and “DC FT”.

- For Example:
 - Zoom Virtual Soccer game Juventus vs Inter Milan.
 - Player A bet on Juventus to win and Player B bet on Juventus to win or draw
 - If Inter Milan is winning 0-2 and Juventus score to make it 1-2 with a Golden Goal, both players A & B will instantly win independently from what the final result of the game will be.

Early Payout

The “early payout” is a feature that allows the user to win his bet before the game is finished. The feature can be applied, at Bet9ja sole discretion, when a team is winning by many goals before the final whistle.

For Example:

- If after 80 minutes, Juventus is winning 3-0 against Salernitana, the outcomes 1 and 1X will be set as winnings.
- The teams paid as winning ones with “early payout” will be colored in green in the “Livescore” section.
- In the situation where the final result ends up being different from the one paid with the “early payout”, 2 outcomes will be paid.
